Clean Tech Caribe (CTC)

CTC aims to rebuild the
Caribbean Basin electrical grid,
one island at a time.

CTC - The Opportunity

Caribbean Basin is...

...blessed with great sun, steady trade winds and strong currents

...requires most traditional fuel - including oil, gas and coal - to be imported, thus increasing the costs for traditional power

...prone to natural disasters

CTC - Why Now

- ...political and public momentum for clean tech*
- ...US Stimulus plan earmarks \$32 Billion for clean energy projects + \$27 Billion for energy efficiency projects*
- ...continually improving and efficient renewable energy options*

CTC - Unique Proposition

CTC's microgenerated power and smart grids provides...

...cost effective power

...reliable, self-healing grid able to recover organically from hurricanes and other natural disasters

...poor communities an opportunity to get on the grid, improving their lives and reduces the environmental impact from their current means of power

CTC - Needs People With...

- ✓ Clean Tech technical expertise
- ✓ NGO and Governmental Affairs experience

- ✓ *And clearly, a graphic artist / powerpoint pro*

Clean Tech Caribe

Thanks!
